

The Journal of Engineering Graphics

— Index 1955-65 —

COPIES OF INDEX

A copy of this index was mailed to all subscribers with the February 1966, Vol. 30, No. 1 issue of the Journal of Engineering Graphics.

One (1) additional copy may be secured free of charge by sending your request to James H. Earle, Circulation Manager and Treasurer, Journal of Engineering Graphics, Texas A & M University, College Station, Texas 77840.

Libraries may have additional copies upon request.

General Motors Institute

BACK ISSUES OF THE JOURNAL OF ENGINEERING GRAPHICS

Back issues are available in limited supply and may be obtained by sending a request to James H. Earle, Circulation Manager and Treasurer, Journal of Engineering Graphics, Texas A & M University, College Station, Texas 77840. Enclose fifty cents (50¢) per copy with your request.

THE JOURNAL OF ENGINEERING GRAPHICS

INDEX

GUIDE TO THE INDEX:

Each entry is accompanied by a notation such as "NF63,6." This means that the item or author's name is in the November (fall) 1963, issue and that the item begins or the author's name is found on page 6. FW means February (winter issue) MS means May (spring issue).

SUBJECT INDEX

In some instances, changes in titles have been made where original titles are not sufficiently indicative of the subject content. Articles dealing with several topics appear under several headings.

AUTHOR INDEX

With few exceptions, titles in the Author index are listed as they appear in the Journal.

SUBJECT INDEX

ADMINISTRATION

- Administration of an Engineering Graphics and Design Course, Alexander S. Levens, University of California, Berkeley. FW63,21
- The Objectives and Content of Engineering Graphics Courses, Melvin L. Betterley, The State University of Iowa. NF62,56
- Problems in Administrating Engineering Graphics as a Part of Mechanical Engineering, John H. Hernandez, Manhattan College, N.Y.. FW62,20

ADVANCED DRAWING AND RESEARCH

- Advanced Course in Graphics.
 - D.P. Adams M 42, 2
- Advanced Degrees in Graphics.
 - A.S. Levens M 38,16
- Advanced Drawing in Industry.
 - R.R. Hagen M 52,23
- Application of Advanced Graphics.
 - F.A. Heacock F 52,11
- Application of Advanced Graphics:
 - Crystallography. H.T. Evans, Jr. . M 48, 8
- Belt Tightener for Motor-Compressor. R.R. Worsencroft . F 42,10
- Cancer Treatment Calculation Aided by Descriptive Geometry.
 - H.W. Vreeland F 54,15
- Centering Attachment.
 - B.L. Wellman N 41,17
- Clutch Fork Fig Assembly.
 - H.W. Savage N 40,13
- Combined Bearing Cap, Speedometer Gear and Work Housing.
 - H.W. Savage N 43,14
- Design and Research.
 - F. McFarland M 52,18
- Graphics in Research. A.S. Levens . M 51,13
- Graphic Skills in Solving Differential Equations.
 - G.W. Walsh, Jr. F 53,14
- Possibilities in Advanced Graphics.
 - F.A. Heacock F 48, 5

Research in Engineering Graphics.

- J.H. Earle, Texas A & M University SM65,7

ADVANCED STANDING. See Division, Committee.

ANTHONY, GARDNER C.

- An Appreciation of. C.L. Svenson . . O 38, 3
- Tribute to. F.W. Ming J 38,15
- Unveiling of Bas Relief.
 - A.W. Leighton M 39, 2

ARMY SPECIALIZED TRAINING.

- W.E. Street F 44,12

A.S.A. Z14 REVISION REPORT.

- R.P. Hoelscher N 49,23

AXONOMETRY. See Pictorial Representation.

CABINET. See Pictorial Representation.

CARTOGRAPHY

- Cartography - A Graduate Course in Graphics. J.G. McGuire F 53, 7
- Cartography, Isometric Block Diagrams in. R.O. Huzarski . . . N 50,20

CHEMICAL ENGINEERING AND

- DRAWING. R.C. Kintner M 40,17

COLLEGE CREDIT FOR HIGH SCHOOL

- DRAWING. See High School-College Relations.

COLOR IN TEACHING. See Teaching Aids.

COMMITTEES. See Division, Committees.

COMMON ERROR IN TEXTBOOKS, A.

- G.J. Hood M 39, 6

COMMON ERROR IN TEXTBOOKS, A.

- G.J. Hood F 41,18

COMPETITION, DRAWING. See

- Division, Committee on.

- COMPUTER GRAPHICS SYSTEMS
The Place of the Digital Computer in
Graphics Instruction and the Purpose
of Flow Diagrams, C.J. Baer,
University of Kansas. NF63,13
- CONFERENCES. See Division,
Conferences.
- CROSS RATIO IN ELEMENTARY
DRAWING. S.A. Coons F 50, 9
- CULTURAL VALUES. See also
Engineering Education.
Humanistic-Cultural Contributions
of Engineering Drawing and
Descriptive Geometry.
F.G. Higbee F 48, 8
What Price Culture in Engineering
Drawing, Descriptive Geometry
and Elementary Machine Design.
Part 1, J.L. Hill O 38, 6
Part 2, H.W. Leet O 38,10
Discussion, C.H. Black O 38,14
Discussion, A.S. Langsdorf O 38,16
Discussion, H.C. Spencer O 38,16
Discussion, E.L. Williams O 38,11
- DESCRIPTIVE GEOMETRY
The Challenge of Multidimensional
Parallel-Axis Projection, Forrest
M. Woodworth, University of
Detroit. NF62,26
The Christian Approach to Vexing
Vectors, Marshall J. Christian,
General Motors Institute. NF64,11
Aims of Descriptive Geometry.
H.B. Howe M 40, 2
Airplane Lines and Lofting.
B.D. Washburn M 41,12
Analytic and Graphic Solutions.
H.C.T. Eggers F 51,26
Application to Geology.
A.N. Appleby F 46,21
The Direct Method in Transfer of
Training. M. McNeary N 53,34
To Circumscribe a Pentagon About
A Circle, V.H. Paquet, University
of Vermont. MS56,36
Descriptive Geometry and Chem-
istry II, Steven Viznerand, Alan
Repko, the Cooper Union. MS63,16
Descriptive Geometry and Design
Applications, John P. Oliver,
Texas A & M University. FN29,17
Descriptive Geometry and Heat
Transfer Studies (An Interview
with Professor Wilson Trip, M.
Blade, the Cooper Union. MS63,11
Descriptive Geometry Courses
Which Comply With the Eval-
uation Report, Raymond A.
Kliphardt, Northwestern
University. FW57,22
Descriptive Geometry in Industry.
F.W. Warner M 47, 5
Descriptive Geometry in Shipbuilding.
R.P. Iodice M 52, 7
Descriptive Geometry, Mechanics,
and Mathematics. W.H. Taylor N 49, 9
Descriptive Geometry Methods.
G.J. Hood O 37, 7
Descriptive Geometry Rides Again.
J. Gerardi M 40, 9
Isometric Approach to Descriptive
Geometry. B.M. Aldrich F 45,17
Make It Practical. J.D. McFarland N 45, 5
Notation and Nomenclature.
(Guide Lines) F 45,11
Descriptive Geometry in the Space
Age, Thaddeus Pozniak, Canisius
College of Buffalo.
Descriptive Geometry of Four Di-
mensions, C. Ernesto S. Lindgren,
U.S. Steel Corporation. NF63,44
Descriptive Geometry: Some Reflec-
tions of the Past and Speculations
for the Future, William B. Rogers,
USM Academy. NF64,16
Engineering Graphics Seminar -
N-Dimensional Descriptive
Geometry and Multivariable
Functions, Steven A. Coons,
Massachusetts Institute of
Technology. FW62,26
"Geometry" and Relativity Today,
John A. Wheeler, Princeton
University. NF64,23
Indexed Projection, Baruch Bergthal,
University of Cordova, Argentina,
(Translated by I. Wladaver). NF63, 6
I Need Help, Robert H. Hammond,
US Military Academy. MS60,18
What Do You Mean "Direct" or An
Old Fogey Strikes Back.
H.C.T. Eggers M 54,34
Why the "Direct" Method, or An
Older Fogey Strikes Back.
G.J. Hood N 54,36
N-Dimensional Descriptive Geometry.
S.A. Coons M 54,21
Treatment-Calculation of Cancer.
H.W. Vreeland F 54,15
Problem in Descriptive Geometry. MS62, 9
Problem Books and Decreased Time.
H. Eggers D 36,14
Reflections on the Fundamentals of
Descriptive Geometry, C. Ernesto
S. Lindgren, U.S. Steel
Corporation FW65, 9
Relation Between Projective and
Descriptive Geometry, University
of Toronto. FW62, 8
Science Is Where You Find It,
R.A. Kliphardt, Northwestern
University. FW63,42
Some Applications of Descriptive
Geometry to Solar Astronomy,
C.E. Rowe, the University of
Texas. MS62,28
Shippard Drafting
Part 1, A.M. Merrill F 43,17
Part 2, A.M. Merrill M 43,12
Stereographic Drawings in Descrip-
tive Geometry. R.T. Henning O 37,14
Symmetry in Four-Dimensional
Space, C. Ernesto S. Lindgren,
U.S. Steel Corporation. SM65,18
Traces vs. Direct Method.
J.P. Oliver F 48,19

DESCRIPTIVE GEOMETRY (Continued)

What Is Fundamental In Descriptive Geometry? B.L. Wellman	F 50, 6
Teaching Descriptive Geometry with Colored Transparencies, Clayton W. Chance, University of Texas. . .	MS62,13
Technique of Projective Geometry and the Application to Engineering Problems, V.P. Borecky, University of Toronto.	NF62, 8
Trisection of An Arbitrary Acute Angle, Walter E. Lambert, Day and Zimmermann, Inc.	FW65,30
Trimetric Projection - Another Reason and Another Way, James R. Holmes, University of Texas. . . .	FW61,20
Way, James R. Holmes, University of Texas.	FW61,20
When Is A Cube Not A Cube?, Michael P. Guerard, Texas A & M University.	NF64,31
Where Angels Fear to Tread, Irwin Wladaver, New York University. . .	SM65,11
Where (Some) Angels Fail to Tread, C. Ernesto S. Lindgren, U.S. Steel Corporation.	FN29,26

DESIGN

Artistic Design for Engineers, O.M. Stone	M 38, 6
Beauty and the Center of Gravity, F. Paulsen	M 54,15
A Backstage of Genius, Kenneth E. Lofgren, the Cooper Union. . . .	MS62, 8
Between the Itch and the Answer, William H. Lichty, General Motors Institute.	SM65, 9
Creative Design in Engineering Graphics, Ernest R. Weidhaas, Pennsylvania State University. . .	MS63,12
A Conceptual Design Experiment in Engineering Graphics, K.E. Hartz and R.J. Foster, The Pennsylvania State University.	FN29,11
Creative Expression in Engineering, R.L. Ritter, A.E. Lemke, and R.J. Panlener, Marquette University. . .	MS60,19
Curriculum in Technical Design, Arizona State University.	MS64,28
Design and the College Freshman, William S. Chalk, University of Washington.	NF64,15
Design and Research, F. McFarland	M 52,18
The Design Team-Engineer and Draftsman, R.C. Smith, Allison Division, General Motors Corporation.	MS56,11
Developing Creativity and Creative Thinking in Engineering Graphics, Jack H. Anderson, General Motors Corporation.	NF59,31
Drawing in Machine Design, V.L. Doughtie	M 46,17
Empirical Design, A Preparation for Theoretical Design, L.D. Hayes . . .	F 40, 6
Engineering Drawing and Its Relation to Designing, Theodore Aakhus, University of Nebraska.	MS58,47

Introducing Design Considerations into Drawing Courses, Harold C. Messinides, Chicago City Junior College, Wright Branch.	FW57,44
Graphics in the Belfry, A. Bigelow . .	N 48, 8
Importance of Drafting in Aircraft Design, M.E. Aldrich	N 53,37
On-The-Job Training in Drafting and Design, Tracy B. Nabors, Chrysler Institute of Technology.	FW59,11
Relation Between Engineering and Machine Design, L.M. Sahag, Alabama Polytechnic Institute. . .	MS56,15
Some Remarks by the Post Chairman Edward M. Griswold, the Cooper Union.	NF62,29
A Streetcar Names Design, Morgan G. Thomas, Keuffel and Esser Vo. . .	MS63, 8
What Can Drawing Departments Contribute to Training for Design? D.L. Arm	M 40, 6

DEVELOPMENTS

Developable Transition Pieces, C.A. Hachemeister and A. Cefola . .	M 42,10
Development of Shell Plating by the Mean-Normal Method, W.J. Dixon	M 52,17
Pi Scale, The, G.W. Mitchell	M 47,20
Rectification of a Circle, P. Bessemer	N 52,30
Rectification of a Circle, J.S. Rackway	N 48,26

DIMENSIONING. See Tolerancing

Advanced Principles in Dimensioning of Engineering Drawings, P.G. Belitsos, General Electric Company.	NF57,14
British and American Methods of Tolerances, S.B. Elrod	F 54, 7
Decimal Dimensioning Adopted by Ford, A.F. Denham	F 40, 4
Decimalized Measure Versus the Metric System, Earl D. Black, General Motors Institute.	NF62,30
Don't Specify the Impossible, L.R. Smith, Allison Division, General Motors Corporation. . . .	FW56,63
Dimensioning, W.E. Street	N 39, 7
Dimensioning and Checking Drawings, R.M. Coleman, Texas Western College.	FW57,49
Dimensioning Drawings, R.T. Northrup	F 40, 2
Dimensioning Practice, A.J. Altz . .	F 41,11
Guide Lines for Dimensioning, F.C. Bragg	M 47,24
Job Analysis for Dimensioning, J.G.H. Thompson	M 45, 7
Measurement, J.N. Arnold	O 37, 1
Methods of Presenting Dimensioning, R.E. Machovina	F 48, 6
More Dimensioning Practice, S.B. Elrod	F 49, 6
New SAE Dimensioning Standards, Col. C.M. Buhl, Budd Co., Jasper Gerardi, University of Detroit, G.L. McCain, Chrysler Corporation	FW56,19

DIMENSIONING (Continued)

Size Description. J.M. Russ M 37, 9
 Student Checking and Dimensioning.
 A. Jackson F 42, 8
 Surface Finish. R.P. Trowbridge . . N 51,23
 Surface Roughness Symbols.
 J.A. Broadston N 45,29
 Teaching Tolerances. J. Gerardi . . M 47,12
 Teaching Tolerances. J. Gerardi
 and E.J. Massard M 48,15
 Teaching Tolerances. J. Gerardi
 and O.B. Noren N 47,20

Basic Principles for the Design of
Drawing Courses to Comply with
the 1955 Evaluation Report,
Charles J. Vierck, The Ohio State
University. FW58,18
What Do You Believe? Stuart C.
Allen, Michigan College of Mining
and Technology. MS56,49
Cartography -- A Graduate Course
In Graphics. J.G. McGuire F 53, 7
Bringing Electronics Into Engineer-
ing Graphics, Harry Schwarzlander
NF61,24
Chemistry and Geometry, Leonard
Kaplan, University of Illinois. . . . NF61,19
The Christian Approach to Vexing
Vectors, Marshall J. Christian,
General Motors Institute. NF64,11
Concept of the "Graphical Mind,"
John T. Rule, Massachusetts
Institute of Technology. FW65,32
Creative Design in Engineering
Graphics, Ernest R. Weidhaas,
Pennsylvania State University. . . . MS63,12

ENGINEERING GRAPHICS (Continued)	
Creative Problems for Basic Engineering Drawing, Matthew McNear, University of Maine.	FW56,48
Descriptive Geometry Courses Which Comply With the Evaluation Report, Raymond A. Kliphardt, Northwestern University.	FW57,22
Design for Barkin Up the Wrong Tree, Irwin Wladaver, New York University.	FW65,21
The Development of Graphical Representation, Frederick G. Higbee, State University of Iowa.	MS58,14
Drafting Problems in Industry and Some Solutions, R.W. Pearson, Radio Corporation of America.	MS56,21
A Drawing Course for Science Majors, Eugene G. Pare, Washington State College.	FW56,67
Editorial, Mary F. Blade.	FW62, 2
Encouraging Creativity in Engineering Graphics, Harold L. Dillenbeck, Pennsylvania State University.	MS62,18
Encouraging Creativity in Graphics, Harold L. Dillenbeck, East Tennessee State University.	FN29, 9
Why Engineering Drawing?, Frederick G. Higbee, University of Iowa.	FW65,19
Engineering Education and Engineering Graphics, Irwin Wladaver, New York University, N.Y.	NF64,26
Engineering Graphics -- Genesis to Engineering Development, Earl D. Black, General Motors Institute.	NF63,17
Engineering Graphics for the "Philosopher" or the "Plumber," Earl D. Black, General Motors Institute.	NF62,16
Engineering Graphics in Norway and the USSR, Steve M. Slaby, Princeton University.	FW61,17
The Engineer's Language -- Drawing, Robert J. Ernest, Ford Motor Company.	FW65,17
An Ex-Editor Turns Critic or Hindsight Is Easier, Irwin Wladaver, New York University.	FW62,42
Fog, Vision, or Insight, Earl D. Black, General Motors Institute.	FN29, 3
Forming Tool Calculations -- Graphic and Algebraic. J.H. Porsch. Part I	M 53,30
Part II	N 53,30
The Function of Graphic and Illustrative Languages in the Communication Process, Robert A. Sencer, Rensselaer Polytechnic Institute.	MS61,16
The Future Course of Engineering Graphics From the Faculty Viewpoint.	MS62,22
Future Development in Engineering Graphics (Interim Report 1962-1963), Future Development Committee.	MS63,36

ENGINEERING GRAPHICS (Continued)	
The Function of Drawing: Creativity, Wayne L. Shick, University of Illinois, Urbana.	NF56,46
Interim Report of the Future Development Committee, Carson P. Buck, Syracuse University.	MS65,46
Gaspared Monge and His Effect on Engineering Drawing (Editorial), Mary F. Blade, the Cooper Union.	NF64, 2
Geometry and Heat Transfer in a Helical Coil, Henry W. Sullivan, the Cooper Union.	MS63,28
Graphics in Engineering Education. F.A. Heacock	F 54,26
The New Graphics. J. Geradi, University of Detroit.	MS65,15
Problems in Graphical Analysis of Mechanisms, Frank A. Heacock, Princeton University.	MS58,48
Graphical Analogues of Mathematical Processes, John F. Twigg, University of Florida.	FW58,24
Graphical Field Mapping, John F. Calvert, University of Pittsburgh.	MS57,35
Graphical Method in Error Analysis of the Photogrammetric Problem, Summer B. Irish, Princeton University.	NF62,19
Graphical Solution for Supersonic Flow Past A Pointed Axisymmetrical Body, G. Fischer, General Electric Company.	MS62,43
Graphics -- An Aid in Planning, Manufacturing and Sales, J.L. Gilmour, Chrysler Corporation.	MS59,25
Graphics and Its Relation to the Development of Guided Missiles, Eugene V. Fesler, Chrysler Corporation.	MS59,23
Graphics and the Undergraduate, Earl D. Black, General Motors Institute.	FW65,26
Graphics Applied to the Craft of Bells and Carillons, Arthur L. Bigelow	FW56,10
Graphical Analysis of a Non-Linear Differential Equation, Charles J. Baer, University of Kansas.	FW63,24
Graphic Science -- A New and Challenging Frontier, Alexander S. Levens, University of California, Berkeley.	NF60,10
Graphics Shock-Wave, Rex W. Waymack, Modesto Junior College	FW62,15
Opportunities and Responsibilities of Graphics in Engineering Education. J.T. Rule	M 53, 7
How to Win Friends and Influence a Profession, Jasper Gerardi, University of Detroit.	MS62,39
On the Importance of Drafting in Engineering Development, Charles A. Chayne, General Motors Corporation.	MS59, 8
Integration and Graphics, Irwin Wladaver, New York University	FW57,11

ENGINEERING GRAPHICS (Continued)

Inter-Disciplinary Challenges for Graphics, Steve M. Slaby, Princeton University. NF62,40

Introducing Design Considerations Into Drawing Courses, Harold C. Messinides, Chicago City Junior College, Wright Branch. FW57,44

What Does and Engineer Have to Know? (Editorial), Irwin Wladaver, New York University. . MS57,11

Multi-View Drawing by the Direct Method, David L. Cook, University of Nebraska. MS57,34

National Graphics Study in Progress. FW63,50

The New Breed, Earl D. Black, General Motors Institute. NF64,3

Objectives of Engineering Drawing In Engineering Education, R.R. Worsencroft, University of Wisconsin. FW57,32

Objections to the Project Method of Teaching Engineering Drawing, James D. McFarland, University of Texas. FW56,38

Operational Symbolism for Graphical Processes, Steven A. Coons, Massachusetts Institute of Technology. NF57,27

Perspective -- A New Basic Method of Direct Projection, Andre Halasz, City College, New York, N. Y. . . MS56,42

Perspectives in Engineering Graphics, Newman A. Hall, Commission on Engineering Education, Washington, D.C. FW63, 6

A New Perspective Method, Wayne L. Shick, University of Illinois. . FW58,43

Problems Confronting the Teacher of Engineering Drawing, Eugene G. Pare, State College of Washington. FW58,20

Should Engineers Be More Proficient in Instrumental Drawing or Freehand Sketching, J.R. Simonia, Detroit Edison Company. MS59,10

Be Susceptible to the Graphical Approach, Douglas P. Adams, Massachusetts Institute of Technology. MS65,45

Projections for a Geodesic Sphere, Homer L. Puderbaugh, University of Nebraska. FW63,28

Reappraisal of Engineering Drawing R.P. Hoelscher. M 54,12

Sketched Exploded Views as a Product Designer's Tool, Richard J. Rademacher, AC Spark Plug Division, General Motors Corporation. FN29, 7

About Scales, Sandor T. Halasz, City College of New York, N.Y. . . NF64,22

Status of Engineering Drawing -- 1957 Survey, Warren J. Luzadder, Purdue University. FW58,14

Theoretical Graphics, Steve M. Slaby, Princeton University. . . . NF60,21

ENGINEERING GRAPHICS COURSES

A Balanced Course in Engineering Graphics, Lyle E. Young, University of Nebraska. FW56,60

Course Content in Basic Engineering Graphics, James S. Rising, Iowa State College. NF58,32

Course Development in Relation to An Engineering Curriculum and Future Needs of the Young Engineer, A.P. McDonald, Rice Institute. MS58,49

Engineering Graphics Course Content Development Study, (Condensed by Earl D. Black), National Science Foundation, Paul M. Reinhard, University of Detroit, Chairman. FN29,13

Honors Course in Engineering Graphics, Steve M. Slaby, Princeton University. MS60,12

Descriptive Geometry Courses Which Comply with the Evaluation Report, Raymond A. Kliphardt, Northwestern University. FW57,22

A Drawing Course for Science Majors, Eugene G. Pare, Washington State College. FW56,67

Effective Programs in Engineering Graphics -- How Shall They Be Taught, Randolph Hoelscher, University of Illinois. FW60,19

The Engineering Drawing Course at the US Air Force Academy, John W. Coffey, Jr., US Air Force Academy. NF58,35

What Engineering Departments Expect From the Drawing Courses, Herman C. Hesse, Valparaiso University. NF58,28

Engineering Graphics Course Content Development Study, Paul M. Reinhard, University of Detroit. NF61,21

The Engineering Fundamentals Course at the United States Military Academy, Col. Robert H. Hammond, USM Academy. . . . NF63,38

The Future Course of Engineering Graphics from the Faculty Viewpoint, Steven Anson Coons, Massachusetts Institute of Technology. MS62,22

Graphics Program at Kansas State University, A.E. Messenheimer, Kansas State University. FW60,25

Integration -- Trend or Fad, Carson P. Buck, Syracuse University. MS56,39

Modernization of Basic Drawing Courses, Klaus E. Kroner, University of Massachusetts. . . . MS58,39

The Objectives and Content of Engineering Graphics Courses, Melvin L. Betterley, State University of Iowa. NF62,56

Progress Report of Engineering Graphics Course Content Study, Paul M. Reinhard, University of Detroit. MS62,25

ENGINEERING GRAPHICS COURSES (Continued)

- Report of Course Content, Matthew McNeary, University of Maine. . . FW61,12
- An Outline for an Integrated Course, Carson P. Buck, Syracuse University. FW58,46
- Teaching Introductory Nomography in Basic Graphics Course, Alexander S. Levens, University of California, Berkeley. MS56,35

ENGINEERING SCHOOLS and COLLEGES

- University of California, Berkeley. . . MS58,50
- Cornell University. MS57,42
- Universities of the Far East, F.E. Jordan, University of Arizona. . . FW57,35
- General Motors Institute. NF57,48
- Welcome to Illinois Institute of Technology -- I.L. Hill, Illinois Institute of Technology. MS65,41
- The Rice Institute, A.P. McDonald, The Rice Institute. FW56,55
- Wayne State University, Detroit. . . NF58,23

ENGLAND, STANDARD PRACTICE

- D.A.N. Sandifer. N 45, 9

EQUIPMENT FOR DRAWING ROOMS

- Desirable Characteristics of Lighting. J.O. Kraehenbuehl. . . . F 42,22
- Drafting Room Facilities. H.H. Jordan. N 40,21
- Drawing Instrument and Fine Papers. E.F. Carr. F 40,15
- Fluorescent Lighting. G.J. Hood . . N 42,24
- Ideal Drawing Department. Justus Rising. M 37, 1
- Lighting in the Drawing Room. W.G. Darley N 42,13
- A New Drawing Table. U.C. Holland . M 38,14
- New Lighting Developments. R.C. Putnam N 46,22
- Plastics for Drawing Instruments. A.F. Randolph N 48,12
- Quality in Instruments. J.R. Porsch N 50,16
- Some Plastics Are Dangerous. J.M. Russ M 48,20

FRENCH, THOMAS E.

- Lamme Award. F.G. Higbee N 43, 1
- Personality Sketch. C.L. Svensen . . F 45, 4

GEOLOGY, APPLICATIONS IN

- Descriptive Geometry in Geology. A.N. Appleby F 46,21
- Methods of Descriptive Geometry In Geology. J.S. Dobrovlny . . . N 52,14

GIESECKE, FREDERICK E. - Award To. N 51, 4

GRADING. See Testing and Grading

GRADUATE WORK. See Advanced Drawing and Research

GRAPHICAL COMPUTATION

- A Graphical Computation of Hyperbolic and Circular Functions of a Complex Argument, D. Mazkewitsch, University of Cincinnati. . FW59,27
- A Graphical Method for Working with Binary Numbers, Charles J. Baer, University of Kansas. . . . MS62,16
- The Graphic Solution of Simultaneous Linear Equations with More Than Two Variables, M.E. Arthur, International Business Machines. . FW63,38
- On Graphical Solutions for First Order Differential Equations, Forrest Woodworth, University of Detroit. MS62,48

GRAPHICS AND A LAWSUIT.

- G.J. Hood F 50,17

GRAPHICS RE-EXAMINED. J. Rule . . F 47,11

HIGBEE, FREDERIC G.

- Distinguished Service Award N 50, 4
- Response. F.G. Higbee N 50, 9
- Personality Sketch. J.M. Russ . . . F 52, 7

HIGH SCHOOL-COLLEGE RELATIONS

- Basis of Credit for High School Drawing. R.N. Worsencroft M 49, 8
- Blue Print Reading in the Technical High School. H.B. Cobaugh F 46, 5
- College Credit for High School Drawing. L.O. Johnson and I. Wladaver M 52,12
- Comments on a National Survey. H.J. Shufelt M 43, 7
- High School and College Drawing. R.T. Henning F 42, 6
- The Mechanical Drawing Association of New England. A.L. Coyne . . . O 37,11
- M.I.T. Summer Course for High School Teachers. J.T. Rule and A.L. Coyne M 40,13
- Preparation for College Drawing. C.L. Thorndike F 48,14
- Require High School Drawing. R.R. Irwin M 48,25
- Secondary School Drawing as Viewed by the College Teacher. S.J. Berard N 39, 2
- Discussion. R.P. Hoelscher N 39, 5
- Secondary School Drawing for Industry. H.S. Campbell M 40, 3
- Specialized College Training for RCA. J.N. Arnold and F.M. Tallmadge F 45,13
- Standards Are Tools. T.W. Ragan . . F 51,20
- Training for Defense. F.W. Slantz . . F 41, 1

HOELSCHER, RANDOLPH PHILIP

- Distinguished Service Award N 54,19
- Personality Sketch. C.H. Springer . . F 53,20

HOOD, GEORGE J.

- Distinguished Service Award N 52, 6
- Personality Sketch M 51, 9

INDUSTRY - COLLEGE RELATIONS

Advanced Drawing in Industry.
 R.R. Hagen M 52,23
 Application of Technical Sketching.
 H.H. Katz N 46, 6
 Checking Drawings. H.H. Katz . . . M 46,16
 Drafting in Steel Fabrication.
 R.M. Sherman M 51,18
 Drafting Procedures that Reduce
 Costs. A.F. Townsend N 52,47
 Drawing in the Defense Industries.
 A.J. Altz N 41, 2
 Drawing for Life and Industry.
 D. Green F 46,13
 Drawing for National Defense.
 W.G. Smith N 40, 9
 Curtiss-Wright Engineering Cadette
 Program at Purdue, 1944-1945.
 S.B. Elrod N 45,15
 Descriptive Geometry in Industry.
 F.W. Warner M 47, .5
 Drawing for National Security.
 F.W. Slantz N 41, 8
 The Engineering Dept. at Work.
 L.C. Cole F 42,13
 Engineering Drawing as Seen by a
 Consulting Engineer.
 M.C. Nichols N 50,23
 Good Engineering Information for
 Production. C.A. Koepke M 50,20
 Graphics for Industry. M.J. Bergen. N 51,16
 Industrial Application of Drafting
 Standards. L. DeMause. F 52,15
 Industry Evaluates our Students.
 A.S. Levens D 36, 1
 Lettering in Industry. A.L. Ferry . N 40, 2
 Preparing Students for Industrial
 Drafting. J. Gerardi N 39,12
 Requirements of Industry.
 W.L. Senger F 42, 2
 Engineering Drawing in Aircraft
 Design. M.E. Aldrich N 53,37
 Engineering Drawing in Atomic
 Engineering. E.H. Brock F 54,33
 Industrial Drafting Looks at
 Industrial Education, Arthur H.
 Rou, General Electric Company . FW58,51
 Industrial Relations Committee
 Report, Ralph S. Paffenbarger,
 Ohio State University. MS57,12
 Revive Graphics, Wayne L. Shick,
 University of Illinois. FW59, 9
 A Survey of Utilization of Training
 in Engineering Drawing by
 Engineering Graduates Employed
 in West Coast Industries, R.
 Wallace Reynolds, California
 State Polytechnic College. . . . MS63,20
 Where Shall We Draw the Line?
 C.J. Chaffins N 53, 8

INDEX

Index, Journal of Engineering
 Drawing. Index, 1936-52.

Examine the advantages of the WM. C. BROWN BOOK COMPANY ...

SPECIALIZED PUBLISHING PLAN FOR COLLEGE AUTHORS

Publish Your

- Mimeographed Notes
- Textbook
- Syllabus
- Laboratory Manual
- Workbook

In Professional
Form!

Tailor-Made

To Fit

Your Classes!

WM. C. BROWN BOOK COMPANY is designed to service college professors who are unable to find a textbook, laboratory manual, or workbook which is suited to their needs. During the past five years more than 500 college professors have found their own books, developed on their own campuses to fit their own teaching needs and physical equipment, to be the ideal solution to their textbook problems. Through our service, these books were professionally designed and manufactured, and always competitively priced—usually far below the cost of the books they were using.

At this time many new benefits have been added to our publishing plan, including:

- Complete financing — we cover all costs.
- Generous royalty paid to author on each book sold.
- Professional design provided for cover, title page, and general layout.
- Complete storage, shipping, invoicing, and collecting provided by us.
- You choose size, paper stock, and binding.
- Your book is completely reset including all technical symbols, italics, etc.
- A set manuscript form is not required.

All that our publishing plan requires is that 300 or more students a year at your school will use your book. We will be happy to send you more information, or have our representative call to explain the plan in greater detail. You are not obligated in any way.

Dear Sirs:

Please send more information about your Specialized Publishing Plan for College Authors. (No obligation, of course.)
